

EYAD ODEH

Full Stack Developer

+962788750575 | odeg.eyad96@gmail.com | github.com/eyad96 | linkedin.com/in/eyad-odeh | Amman, Jordan

PROFESSIONAL SUMMARY

Software Engineering graduate and Junior Full Stack Developer with hands-on experience designing and deploying responsive web applications. Proficient in React 19, Next.js (App Router), TypeScript, and Tailwind CSS, with practical exposure to secure authentication via Clerk and dynamic state management using Convex and Supabase. Skilled in Git/GitHub, Agile workflows, and web performance optimisation for cross-browser compatibility. Committed to writing clean, maintainable code and contributing effectively within collaborative engineering teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks: React.js, React 19, Next.js (App Router), Node.js, Express.js

Styling: Tailwind CSS, Responsive Design

Backend & DB: Supabase, Convex, MongoDB, SQL

Auth & Media: Clerk (JWT, RBAC), Cloudinary

Tools: Git, GitHub, Vercel

PROFESSIONAL EXPERIENCE

Web Development Intern

HTU (Hashemite Technical University) — Amman, Jordan Jan 2021 – Jun 2021

- Built and deployed responsive web applications using HTML5, CSS3, and JavaScript (ES6+), improving UI consistency across multiple screen sizes
- Developed reusable React.js components using React Hooks (useState, useEffect), reducing development time and improving code maintainability
- Collaborated with team members using Git & GitHub for version control, following Agile development practices
- Focused on UI/UX best practices, accessibility, and cross-browser compatibility

PROJECTS

Al-Hewwari Salon Booking App

[React 19](#) • [TypeScript](#) • [Supabase](#) • [Clerk](#) • [Tailwind CSS](#) • [Cloudinary](#) [alhewwari-salon.vercel.app](#)

- **Architecture & Logic:** Designed and built a comprehensive commercial booking dashboard and customer loyalty framework for modern barber salons.
- **Strategic Fix:** Eliminated client-side double-booking state drifts by building custom React Hooks to handle real-time active availability slots synced against normalised timezones.
- **Security:** Formulated secure authorisation routes via Clerk JWT webhooks for strict role-based access control.

Enterprise Data Analytics Dashboard

[Next.js](#) • [React](#) • [TypeScript](#) • [Recharts](#) • [Framer Motion](#) • [Tailwind CSS](#) [dashboard-coral-seven-24.vercel.app](#)

- **Data Intelligence:** Developed a high-fidelity analytics panel rendering massive interactive SVG grids and canvas-plotted system diagnostics dashboards.
- **Performance Solution:** Isolated intensive rendering cycles using React memo structures, decoupling high-frequency real-time queries from the layout paint thread to ensure fluidity on lower-end viewports.

EDUCATION

Bachelor of Science in Software Engineering

Hashemite University — Zarqa, Jordan 2016 – 2020

LANGUAGES

English: Professional Working Proficiency | Arabic: Native
